# INTRODUCTION

Piano, also called pianoforte, French piano or pianoforte, German Klavier, a keyboard musical instrument having wire strings that sound when struck by felt-covered hammers operated from a keyboard. The standard modern piano contains 88 keys and has a compass of seven full octaves plus a few keys.

# IDEA BEHIND

Our main idea is to work on the user interface and provide a simple design of a piano for the user to play and enjoy the different sounds.

# HOW IT WORKS

There are simple keys through which we can play a sound. Simply Click on any of the key to generate a decent music and if you want a bass so you may click the right button of your mouse, it will generate a bass sound.

# CONCLUSION

We are following the current world theme to provide an easy to use user interface and to provide the best user experience. Piano is one of the good musical instruments and we try to provide a best UI/UX.
